Being an XM radio subscriber who actually chooses to pay for my radio programming rather than getting it for free, I strongly urge the FCC to reject the NAB's petition 04-160. XM provides quality programming that simply is not available with standard radio programming and I do not feel that their first amendment rights should be subjectively controlled by a group of lobbyists who feel threatened by XM's quality and variety of programming. I live in a rural mountainous community and there are many areas that I can not receive standard programming over FM or AM frequencies thus XM becomes my only choice to stay in touch with what is going on. If the FCC chooses to accept this petition I fear this will be doing a grave injustice to the American public. This very thing is why our troops are fighting all over the world right now...to ensure freedom of choice. It is the people's choice not lobbyists or the government organizations.
